PROFILE

Driven and adaptable **Computer Science Engineering Student (S4)** at **College of Engineering Aranmula**, with strong interests in **Artificial Intelligence, Machine Learning, Software Development, and Full Stack Development**. Currently serving as **Campus Lead at muLearn**, actively leading technical communities, peer learning initiatives, and student engagement activities while continuously building expertise through **DSA, GitHub projects, internships, and AI/ML training**.

SKILLS

AI / ML Expertise
Software Engineering
Web Development
Problem Solving
DSA & Competitive Coding
Database Systems
GitHub & Git
Leadership
Communication
Public Speaking
Teamwork

EDUCATION

**College of Engineering
Aranmula**

B.Tech - Computer Science
Engineering
2024 – Present

LANGUAGES

- Malayalam
- English
- Hindi

EXPERIENCE

- **muLearn — Campus Lead**

Leading campus-level technical community initiatives, student engagement programs, and peer learning activities. Coordinating workshops, skill-development sessions, and collaborative technical events for students.

- **IBM Q2D Student Resource Platform — AI/ML Learner**

Currently pursuing an **Artificial Intelligence and Machine Learning course** with a focus on practical learning, hands-on projects, and industry-relevant concepts.

- **Corizo — Machine Learning Intern**

Feb 2025 – Mar 2025

Successfully completed one-month training in **Machine Learning**, covering data preprocessing, model training, and AI fundamentals with active participation in practical tasks.

PROGRAMMING LANGUAGES

Python, C, C++, JavaScript, HTML, CSS, SQL

TECHNOLOGIES & FRAMEWORKS

React.js, Tailwind CSS, Node.js, Express.js, MERN Stack, REST APIs, Git, GitHub, MongoDB, SQL, VS Code, Pandas, NumPy, Scikit-learn

PROJECTS

SwiftCache

Designed and developed a **custom in-memory key-value database engine**, similar to **Redis**, for ultra-fast data storage and retrieval. Implemented optimized memory-based caching mechanisms and efficient data access logic to improve performance and reduce latency in read/write operations.

Aerthys — AI-Powered AQI Prediction Using NASA TEMPO Satellite Data

Aerthys is an AI-driven environmental intelligence project developed during a hackathon to predict **Air Quality Index (AQI)** using **NASA's TEMPO (Tropospheric Emissions: Monitoring of Pollution) satellite data** combined with temporal atmospheric and weather features.

Budget App

Created a React.js budget management application for tracking expenses and financial records.

Database Project

Developed a structured database application for efficient data storage and retrieval.

CERTIFICATIONS

Machine Learning Internship Certificate — Corizo

Completed one-month internship training in Machine Learning (*Feb 2025 – Mar 2025*).

Web Development Internship Certificate — Corizo

Completed one-month internship training in Web Development (*Jan 2025 – Feb 2025*).

Artificial Intelligence & Machine Learning Course — IBM Q2D Student Resource Platform

Currently pursuing industry-oriented AI/ML training and hands-on learning modules.

Participation Certificate — NASA Space Apps Challenge

Recognized participant in the global innovation and problem-solving hackathon.

Campus Leadership Recognition — muLearn

Campus Lead role and community leadership activities.
